Cuidamos de ti y de la vida útil de tu motor

FILTROS AIRE

AUTOMOTRIZ

La mayoría de los contaminantes que entran a tu motor, entran a través del filtro de aire.

Principal Función

Retiene en la medida de lo posible, las posibles impurezas que puedan acceder al circuito de admisión de cualquier motor de forma que se evite la contaminación de la cámara de combustión y el degradado de las paredes de los cilindros.

Por este motivo los filtros de aire siempre se sitúan al inicio de este circuito y su mantenimiento influye directamente sobre la vida útil de motor, el cual se vería seriamente afectado mientras el funcionamiento del filtro de aire o su estado no fuesen los correctos.

Un Nuevo Filtro Ayuda

- Aumentar el flujo de aire
 - Aumenta la potencia
- Mejora el rendimiento general del motor
- Evitar que las partículas que dañan al motor entren y provoquen un daño prematuro al motor

FILTROS JOE® recomienda **REEMPLAZAR EL FILTRO** cada **20,000 kilómetros.**

Filtro de aire en mal estado

- Aumento de consumo de combustible.
- Reduce la potencia del motor (ya que la mezcla no se estaría quemando de manera adecuada).
- Aumenta la salida de gases contaminantes.
- Limita el flujo de aire. Reduce el rendimiento en general.
